EXPERIENCE

Cognifyz Technologies Machine Learning Intern

Jan 2026 – Feb 2026
Remote

- Designed a predictive regression model utilizing **Scikit-learn**, achieving 92% rating forecast accuracy.
- Developed a recommendation system processing 50k profiles using **Python**, improving user engagement by 25%.
- Optimized geospatial **Data Pipelines** leveraging **Polars**, reducing data cleaning latency by 40%.
- Automated **Model Deployment** into production utilizing **CI/CD**, ensuring 99.9% system uptime.

PROJECTS

Cerberus — Multi-Tenant Authentication Platform

- Developed an authentication SDK and management platform using **FastAPI**, reducing developer integration time by 50%.
- Engineered **REST APIs** for tenant management and rate limiting via **Redis**, enhancing reliability by 40%.
- Integrated **OAuth2**, **JWT**, and **RBAC** to secure endpoints, supporting 10k+ daily active sessions.
- Automated integration testing and deployment pipelines using **GitHub Actions**, cutting deployment time by 30%.

Eventsnap — Async Facial Recognition API

- Engineered a facial recognition API using **FastAPI** to automatically sort event attendee photos.
- Built a containerized GPU environment utilizing **ONNX Runtime**, computing 512-D embeddings in under 50ms.
- Implemented sub-millisecond **Cosine Similarity** facial matching via **PostgreSQL**, matching 100k+ records.
- Orchestrated async encoding pipelines using **Celery** and **RabbitMQ**, processing 3,000 photos per hour.

SKILLS

- Languages:** Python, C++
- Backend:** FastAPI, REST APIs, Celery, OAuth2, JWT
- ML / AI:** PyTorch, ONNXRuntime, Scikit-learn, Polars
- Databases:** PostgreSQL, SQL, NoSQL, Redis, pgvector
- Cloud & DevOps:** Docker, AWS, GitHub Actions, Git, CI/CD
- Architecture:** Microservices, Distributed Systems, Event-Driven, SOLID Principles, Hexagonal Architecture
- Developer Tools:** OpenAI Codex, Antigravity IDE, Antigravity 2.0

CERTIFICATIONS

- Applied Machine Learning in Python** — Univ. of Michigan (Coursera) [\[Certificate\]](#)
- AWS Academy Graduate: Machine Learning** — Amazon Web Services [\[Badge\]](#)
- AWS Academy Graduate: NLP** — Amazon Web Services [\[Badge\]](#)
- AWS Academy Graduate: Cloud Foundations** — Amazon Web Services [\[Badge\]](#)

EDUCATION

VIT Bhopal University, Bhopal
B.Tech in Computer Science & Engineering (Specialization in AI & ML)
Coursework: Deep Learning, NLP, CV, RL, Linear Algebra, Statistics, OS, DSA

Sep 2023 – May 2027 (Expected)
CGPA: 7.48 / 10.0
